

Disability Football Development

Steven Johnson ED&I lead EITC

A description of the presentation

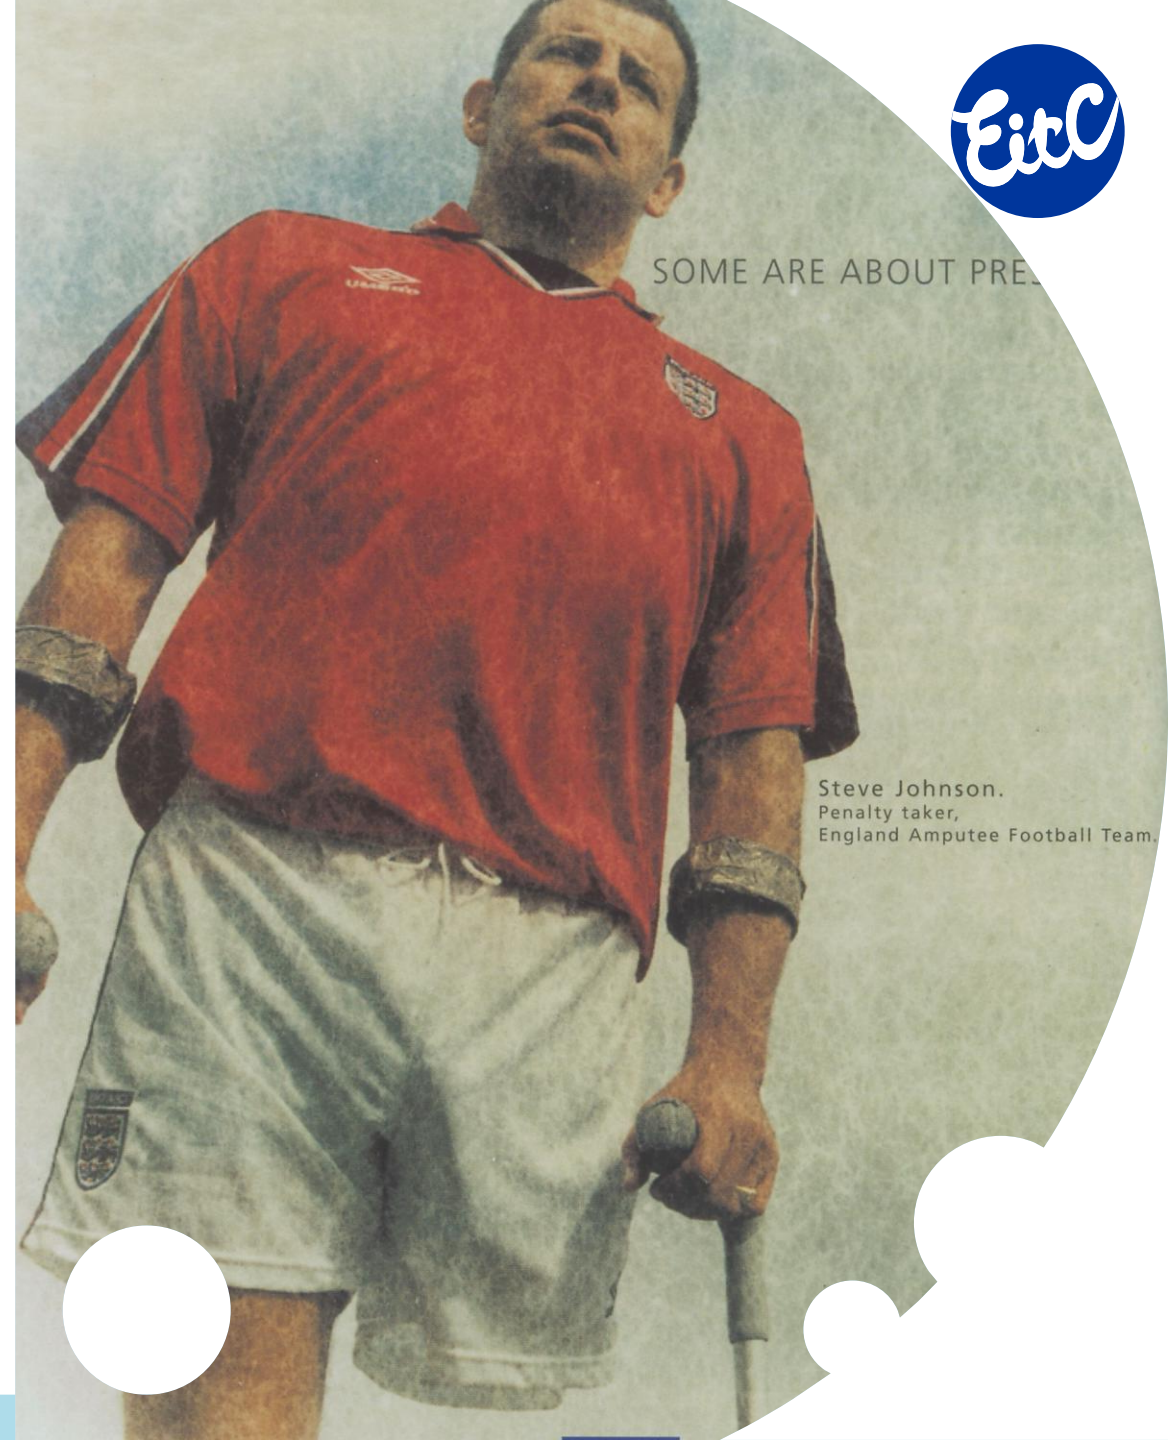

My background

I became disabled in 1985 following a football accident in a sports hall

El went from playing football whenever I wanted, to having no football opportunities as an amputee

It wasn't just the same for me as an amputee I discovered it was the same for all disabled people

Since I lost my leg I have dedicated my life to provide football opportunities for disabled people
